3. In regards to Claim 1 the prior art of record fails to disclose a method for digitizing portions of a waveform sent through a moisture-bearing medium, providing an unshielded transmission line that passes through the medium, providing a shielded transmission line connected to the latching comparator, launching a waveform on the unshielded transmission line, and measuring the amplitude of the resultant waveform at the latching comparator by using successive approximation, specifically in the combination as claimed.
4. In regards to Claims 11 and 21, the prior art of record fails to disclose a method for digitizing portions of a waveform sent through a moisture-bearing medium comprising the steps of launching a waveform onto a transmission line that ends at an open or shorted distal end and using successive approximation to measure the amplitude of the waveform in the specific combination as claimed.
